## **The New Manual Test Fixtures of the MA 32xx Series for High Volume Production and Rough Field Applications**

The Manual Test Fixtures of the new MA 32xx Series are designed for high volume production and rough field applications and are therefore pioneers in this field in regard to ruggedness, life-cycle and parallel stroke.

The Test Fixtures of the MA 32xx-Series are especially attractive regarding high contacting force application up to 2000N, the integrated Intermediate Interface, the set-up with Replacement Kits and the upgrade capabilities with optionally available additional components of the MA 21xx Series thanks to the robust design and the extremely high parallel stroke of 22 mm.

The Manual Test Fixtures of the MA 32xx Series are available in the renowned sizes MA 3211, -12, -13, -13T and -14 and are also available with the common Test System Interfaces which are compatible with the Replacement Kits of the MA 21xx series.
