

Altix-Automatech, Expert In Direct Imaging & Photo Imaging Solutions, Establishes Altix North America Incorporation

Altix-Automatech is delighted to announce that it has established its new subsidiary Altix North America Incorporation in the US to reinforce the sales and the service of its current and future customers, and to support its growth in the region.

Having hundreds of equipment in operation in North America, Altix also responds to the needs of its customers to act more locally with different offices in the West Coast, Middle West, and East Coast.

With more than 25 year experience, **Altix-Automatech** is a world leader in providing photolithography equipment and becomes the only full expert in imaging process, primarily for printed circuit boards (PCBs), flexible printed circuit board (FPCs), Touch Panel (TP), Integrated Circuit Substrate industry (ICS), fine metal etching & thin film solar cells. The Company designs, develops, manufactures, markets and services, semi – automated, Roll-to-Roll & automated imaging systems. Its core competency also integrates the design and development of its own operating and alignment system software known as “**Altix Imaging Suite™**” solution that fully benefits all its customers worldwide.

Altix has a portfolio of a full range of UV exposure solutions that includes:

- 1- **ADIX-SA**, a unique UV LED DMD Direct Imaging solution for different processes based on its ALDS™ technology, which is designed with high autofocus and depth-of-focus to accurately image high resolution for lines/spaces down to 30µm plus to register down to ±8µm the image to the panel on the most challenging surfaces and at the lowest cost;
- 2- **ACURA™** Series - a fully automatic double-sided and dual-single sided UV exposure solution for all exposure processes with high imaging requirements;
- 3- **ARROW™ & Evol2C Roll-to-Roll™**– dedicated to the Flex Printed Circuits, and Touch Panel, Metal Etching, Lead Frame, and Photovoltaic as well for all filmed process;
- 4- **AFOSA™** Series – a semi automatic double side exposure system for all exposure processes.

Altix headquarters are located in France with its Research & Development Centre including Manufacturing facilities, with additional manufacturing in Taiwan only for semi-automatic imaging system and offices worldwide (USA, Europe, China, Taiwan, Korea, India,...) including **Altix China**, its subsidiary in China, and **Altix North America** in the US, which enable Altix to work closely with the major PCB & FPC makers.
