

Ground Hunting & Shooting Chair

Benchmaster, an industry leader in shooting tables, rests and other shooting accessories, introduces the new Ground Hunting & Shooting Chair. This chair can be used in a ground blind, or for target practice and scouting, or outside for shooting predators or prairie dogs. But with features such as three (3) multi-position legs that level the seat on uneven terrain and full 360-degree rotation capability, this seat can be used in the field for extreme target shooting and hunting.

The Ground Hunting & Shooting Chair has a durable foam padded back and seat for extra comfort. It has three (3) multi-position legs, with large, solid foot plates, that can be adjusted separately for sitting on unlevel ground, or adjusted for a junior shooter. The seat rotates a full 360 degrees, quietly, for full range of shooting. So wherever the location you plan on shooting, the Ground Hunting & Shooting Chair will ensure comfort and stability, and a full 360-degree shooting range.

When shooting from a seated position, a gun rest is a must. The Ground Hunting & Shooting Chair offers an arm extension for a gun rest. Whether you're target shooting, scouting or hunting, this seat will accommodate all your needs.

With such a versatile seat, you need to be able to take it anywhere, and you can, easily. The Ground Hunting & Shooting Chair has a shoulder strap that makes for easy transport to the field, and it weighs less than 14 pounds. The seating is made of high-quality cordura webbing for all-weather use, and the powder-coated steel frame prevents rust. So even in harsh weather conditions, the Ground Hunting & Shooting Chair will stand up to the toughest conditions. Experience the ultimate shooting solution, and use a Ground Hunting & Shooting Chair on your next outdoor shooting adventure.

Key Features:

- Durable foam back & seat for extreme comfort
- Full 360 degree rotation: both with and without the legs attached
- Power-coated, lightweight steel that avoids rust
- Shoulder strap for easy transport

- Three (3) Multi-position legs to level the chair on uneven terrain, or adjust to shorter shooters
- High-quality, cordura webbing for all weather use
- Arm extension for gun rest and optional camera mount
- Super quiet rotation
- Large, solid foot plates for stability
- Three (3) Year Warranty
