

FOR IMMEDIATE RELEASE:

Spartan GoCam Featuring Realtree Xtra

Norcross, GA - Nov 9th, 2016 -

Spartan GoCam is proud to announce the upcoming launch of a Spartan GoCam featuring the Realtree Xtra camo pattern. The combination of industry-leading technology with one of the most desired camo patterns in the outdoor industry makes for an exciting addition to the Spartan GoCam lineup.

The Spartan GoCam, connected by Verizon, makes use of the nation's largest wireless network to provide the widest signal coverage possible. In addition to the expansive coverage areas provided by the Verizon network, Spartan GoCams also feature data rates as low as \$5/month to add to the existing Verizon data plan.

Spartan knows that product durability is important to the true outdoorsman. Spartan GoCams were designed from the outset to provide industry-leading durability. Features like an easy-to-use, but highly effective latch design, along with robust water-intrusion prevention make for a camera that has an impressive ability to stand up to the outdoor elements. All Spartan GoCams are backed by a full two-year warranty.

An often overlooked, but critical part of the functionality of a wireless camera is how the images are viewed. Spartan has designed an intuitive and easy-to-use app for smart phones, which is available in both iOS and Android. Along with the app, a web portal, which can be accessed from the browser on any computer, is also available. In addition to viewing images, both the app and web portal allow for full remote camera management. This provides Spartan GoCams a true two-way interaction between users and all of the features of the camera.

Spartan GoCams Feature:

- Connectivity to the Verizon network for \$5 monthly access
- Industry leading durability backed by a two-year warranty
- The best access to your images via app or web portal
- Class-leading image quality
- Outstanding battery life
- World class product support
