FOR IMMEDIATE RELEASE:

Boker Tucan

Lakewood, Colorado (January 5, 2017) – Boker USA is proud to introduce the Boker Tucan.

Many fans know Solingen-based knifemaker Wilfried Gorski as an ingenious tinkerer. The designs of his mechanism undoubtedly deserve special attention. With the Tucan, we present a unique combination of elegant spring knife, assisted opener, and manually deployed pocket knife, with the fascinating element being that all three features do not operate alternatively, but simultaneously. When actuated, the safety slide under the blade pivot deploys the blade slightly using spring force, whereupon the blade is subsequently fully deployed manually.

The handle consists of premium satin finished titanium, creating an elegant contrast with the carbon fiber inlay in the scales and blade pivot screw. The blade is made from N690 and features a two-tone finish. The small slide also disengages the blade for retracting. A unique concept by Wilfried Gorski, executed as a highly exclusive, series-produced gentleman's folder by the Boker Manufactory Solingen. Blade length: 2 $\frac{7}{8}$ ". Thickness: 2.5mm. Overall length: 6 $\frac{7}{8}$ ". Weight: 2.9 oz. MSRP: \$339.00.

The Boker Tucan, model 110652, is available for purchase through Boker USA, Inc.
