

Fortis Mfg LA-Stock GunPorn - AR15NEWS

A few days ago I shared a [sneak peek at the new Fortis Mfg LA \(Lever Action\) Stock](#). At that time all I had was a few CAD Drawings of the stock which looked awesome but was still hard to tell what it was going to look like. NOW....now I have some hotness! My buddy David was allowed to borrow a prototype LA-Stock that had been finished and install it on a rifle. Your opportunity to win one of these beautiful stocks and some pics can be found below!!

The Fortis Mfg LA Stock shown in these photos is still considered a prototype as there are a few tweaks that they are working on but you get a really good idea of what will be officially released in 1st Quarter 2017. The LA-Stock will not be a polymer stock but is a high end all aluminum stock with some actual carbon fiber accents. These won't be cheap but they'll be competitive with other aluminum stocks.
