For Immediate Release

WatchAbout Wireless Wrist-Worn Monitor & Transmitter

Zistos introduces the WatchAbout, a wrist-worn display unique in both its price and performance. It includes a small 5.6 GHz transmitter that attaches to any Zistos WalkAbout LCD display. The WatchAbout allows images to be shared by team members during a tactical mission.

The wireless LCD display and transmitter, with a built-in multi-channel receiver, enable the images to be viewed in real-time, with the operator of any Zistos portable video system.
