

High quality production is praised

Impala Plus got great attraction in all the exhibitions around the world

Impala Plus, semi-automatic kinetic shotgun produced by Istanbul Silah got great interest in the exhibitions of IWA 2017 in Nuremberg, Germany and ProHunt 2017 in Istanbul, Turkey and will be exhibited on the Next booth **N203** in the Shot Show 2018.

12 GA Impala Plus is available in different styles and models like Synthetic, Wood, Camouflage, Marine, Desert, Cerakote as well as colored receiver options in Special Elite, Wood Elite in a range for barrel length of 18" to 32", 4 + 1 for regular and 10 + 1 for High Capacity magazine, slug and high ribbed models. Rifled barrel models are also available.

Mr. Erol Kurt, Istanbul Silah CEO, expressed his satisfaction about the new shotgun as "Impala Plus, which was developed as the result of our accumulated experience for years in this sector, has achieved the high success rate in the presence of notary public (only 3 malfunctions for 5000 rounds). We are getting positive feedback from the shooters testing it in Turkey and in other countries all over the world as well. It is a shotgun that had been perfected by computer-assisted evaluation of our R & D department. We trust in our gun of which all the parts are being produced in our 18 000 m² plant located in Istanbul, Turkey." he said.

In the coming months, the 20 GA model will be presented to hunters and it is expected to attract great attention too.

About Istanbul Silah

Istanbul Silah Sanayi established in Istanbul, Turkey in 2003 to produce sportive hunting shotguns and parts. Erol Kurt (CEO) has 25 years of experience in this sector. During this time, the company has built business partnership with well-known brands and exported shotgun and parts to all over the world including the United States of America. Since 2016, the company has been carrying out all its activities in its modern, new factory building having 18.000 m² area.

Istanbul Silah had produced and put into the market its own brands such as Impala, CZ Turka, Mikado rifles in previous years and by now proudly presents "Impala Plus", with its innovative semi-automatic kinetic system, which has been produced with all design and engineering studies with the company's experience and completed its tests successfully.

The company also has facility safety and rifle and rifled barrels production permit certificates and continues to make important contributions to the country's economy in hunting rifle and defense industry sectors with a growth rate of nearly 25% every year.

The company works with quality and timely production target, nowadays has ISO 9001 Quality System and ISO 27001 Information Security Certificates, employs about 230 people, 10% of its employees are composed of engineer and technical team, all kinds of manufacturing and measuring systems. As a result of R&D activities, it continues its business life proudly as a company with many of its own useful models, patented parts and technologies.
