2018 XGO® Products

Southern Pines, NC – XGO® is always pushing to strive to be the foremost name in next-to-skin base layer. 2018 will be no different! For XGO®, 2018 will hold exciting new products, new patterns, and a new direction.

XGO® is excited to bring some new items, outside of patterns, to the table this year that we really feel can help set us apart from our competition. First is our newest addition to our Phase 2 Performance Collection, a Zip and Zip Hoodie. We took our 100% Waffle Knit Poly and added a traditional Zip Mock and our new Zip Hoodie. The Zip Hoodie will come with a 12-inch zipper, which will allow for added neck protection when fully zipped, and contour hoodie which will help eliminate the elements. Both Zip Mock and Zip Hoodie will come with elastic thumb loops built into the cuff of the garment for added layer assistance when needed. Phase 2 Zip and Zip Hoodie will be available in Tan 499, Black, Regular MultiCam®, and MultiCam Arid™.

Next, we have our Phase 4 DWR Vest. From what we heard in the marketplace, the biggest item we were missing was a vest. Our Phase 4 DWR Vest is constructed out of our DWR (Durable Water Repellent) fabric which causes water to just bead away! With a full-length zipper, dropped tail, chest pocket (for small items) and both side external pockets and front internal pockets, this vest is a must! XGO® Phase 4 DWR Vest will be available in Black and Regular MultiCam®.

How could we make our very popular Phase 4 watch cap even better? By adding ear flaps of course! The Phase 4 Watch Cap with Ear Flaps will be available in Black, Tan 499, Regular MultiCam®, MultiCam Arid™, MultiCam Alpine™ and MultiCam Black™.

With the growing popularity of Three Gun Competition, we decided it was time for us to offer our own version of a shooter shirt. XGO® Shooter Shirt, containing a 12-inch zipper and high neck mock, allows for competitors to wear it two ways. One as a polo by unzipping the zipper and turning the collar down, or fully zipped up as a high mock, which when fully mocked, will aid in eliminating gun strap/sling irritation on the neck when “running-n-gunning.” XGO® Shooter Shirt will be available in a short and long-sleeve in Tan 499, OD Green, Black, Regular MultiCam®, and MultiCam Arid™.

Last is our most exciting offering, MultiCam® printed XGO® Flame Retardant (FR) fabric. MultiCam® will be offered on two of our most popular FR fabrics, FR Phase 1 and FR Phase 2.

With the success of the regular MultiCam® pattern last year, we decided to license all MultiCam® patterns and offer those patterns in key XGO® items. MultiCam® has been the standard when it comes to military

camo and XGO® has been the standard for military next-to-skin layers...XGO® MultiCam®, the perfect cover!
