

**GripSense™ Technology will now be offered in Glock 42 & 43
and the LCP II. Come see the world's latest technology in
Lights & Lasers from LaserMax Products at booth #12771**

The world's most innovative laser sighting system just got better. LaserMax is now offering GripSense™ Activation Technology for the Glock 42 & 43 and the LCP II. The CenterFire® Light and Laser Combination with GripSense™ Activation Technology is the latest from LaserMax Products. Designed to withstand rigors of everyday conceal carry and hard duty use. These new designs are the most anticipated product of the year. LaserMax is currently shipping CenterFire with GripSense Activation Technology for the Ruger® LC9S®, LC380® and the S&W® M&P® Shield™ 9mm|.40 S&W®, in Vivid Red and Daytime Green.

GripSense activation technology represents the newest generation of laser activation technology, which enables activation of the product upon the user taking a firing grip on the firearm with the utilization of GripSense technology with or without gloves. Additionally the CenterFire with GripSense Activation Technology includes some key innovations, which include a fully programmable operating mode, a Quick-Change Battery Hatch™, and a full three (3) hour battery life, which is safeguarded from inadvertent drain by a 10 minute time out feature.
