

Elite Iron announces the new DELTA LITE titanium suppressor at the 2018 Las Vegas SHOT Show.

Potomac, MT / November 3, 2017 - The new DELTA LITE is a lighter weight addition to our original DELTA stainless steel suppressors and is available in .223 up to 6.5 calibers. The new DELTA LITE suppressor is made of titanium and weighs just 14 ounces. The new suppressor has an overall length of 7.5 inches, a diameter of 1.5 inches, and provides sound reduction of 35 decibels.* It features the newly redesigned back blast section which eliminates the need for timing and is a direct thread design.

Designed to be used for a wide range of calibers, the new DELTA LITE will become a favorite of hunters, particularly varmint hunters, and can be used in both bolt action and semi-auto rifles. It should be noted that the DELTA LITE is not designed for heavy semi-auto or full-auto sustained fire.

Elite Iron makes weapon and sound suppressor solutions that provide superior target acquisition, accuracy, custom caliber capability, and sound reduction for elite marksmen, hunters, and serious shooters. Elite Iron stainless steel and titanium suppressors are stronger, quieter, and lighter and are available in 22LR to .50BMG. Our patented REVOLUTION BIPOD revolves 360° around a rifle barrel maintaining the axes to move left to right and up and down while panning with incredible stability. And Elite Iron also makes suppressor wraps for mirage mitigation and heat protection to fit all Elite Iron suppressors and most others.

Visit Elite Iron at Booth 20311 at the 2018 SHOT Show in Las Vegas January 23 through 26. Elite Iron is headquartered in Potomac, Montana. The company is a premier designer and manufacturer of sound suppressor solutions, bipods and other firearm accessories and has a dealer network throughout the United States.
