

New SportFlex™ Series

NEWS PROVIDED BY

ZANheadgear®

Nov 3 04:30 PT

SAN DIEGO, California, November 3, 2017- The ZANheadgear® SportFlex™ Series is centered around an innovative new fabrication which gives a nice mid-weight protection option for your head, neck, and face. Heavier weight than our original Motley Tube®, yet lighter than a fleece lined Motley Tube®. Our SportFlex™ Series gives a level of comfort and warmth not yet on the market. You've got to touch it! The durable, cozy fabrication comes in 3 new items: headband, beanie, and Motley Tube®.

Photos: <http://www.zanheadgear.com/cat/home/new-arrival/true?page=2>

The naturally comfortable fabrication has a brushed finish to give a one of a kind hand on products consumers use daily. With elastane giving the benefit of stretch and optimum recovery, it became clear this fabrication was perfect for our active consumer.

“While developing these products, I couldn’t be happier or more excited with how many different uses and products we wanted to test in this fabrication. In our home office, we have motorcycle riders, runners, snow boarders, you name it- very active people. We all were so impressed with the comfort during testing” explains ZANheadgear® R&D Manager Rachel Goldbaum.

Easy to wash and tumble dry on low. Any 3 of the products are incredibly easy to throw in a bag & take on your adventure.

Stop by the ZANheadgear® booth 31513 for more information. For additional information, visit <http://www.zanheadgear.com>
