

FightLite® RAIDER™ Pistol

M-LOK® STYLE

Through creative engineering and a quest for uncompromising performance, the revolutionary FightLite® Raider™ pistol is in a class of its own and successfully bridges the capability gap between a common handgun and an individual battle carbine.

Featuring direct-gas operation, a rotating bolt and a free floated barrel for optimal accuracy; the semi-automatic Raider™ blends its diminutive size and portability with the reliability, ruggedness and weatherproof characteristics of America's longest serving military rifle. Lightweight, powerful and accurate, the FightLite® Raider™ is available in both 5.56x45mm NATO or .300 AAC Blackout (300 BLK) that delivers overmatch performance against common pistol-caliber handguns and shotguns at extended shooting distances.

Manufactured of high strength aerospace alloys and finished with non-reflective, MIL-Spec coatings for maximum corrosion resistance, the FightLite® Raider™ is designed to perform under the most demanding field conditions including ice, sleet, sand, rain and mud. Suppressor capable and ready, FightLite® Raider™ pistol barrels are gas-ferritic nitrocarburized (Nitrided) from the factory for maximum accuracy and wear resistance and are threaded 1/2-28 TPI on 5.56 NATO barrels and 5/8-24 TPI on .300 BLK barrels to readily accept the most common suppressor mounts, flash hidere, muzzle brakes and other devices.

Accessory friendly, FightLite® Raider™ pistols are equipped with a 12" inch long MIL-STD 1913 top rail that's fully compatible with most modern optics and accessories and is available with a handguard option that supports either KeyMod or Magpul® M-Lok accessory mounts.

Designed for optimal configuration by the user, the FightLite® Raider™ is compatible with many Modern Sporting Rifle parts and accessories including magazines, upper receivers, barrels, bolts, optics and more which significantly reduces a user's logistical requirements for spare parts, accessories and ammunition.

Supported with a full line of performance accessories and manufactured in the USA from the highest quality aerospace grade alloys by American craftsman, the high-performance FightLite® Raider™ is guaranteed to provide its owner with a lifetime of accurate and reliable service.
