

Alien Gear Holsters' ShapeShift™ Modular Holsters Now Available to Purchase Individually

August 16, 2017

Post Falls, ID – Alien Gear Holsters' ShapeShift™ modular holsters, initially offered in the Starter Kit, are now available to purchase individually. This includes the ShapeShift 4.0 IWB Holster, Appendix Carry Holster, OWB Slide Holster, OWB Paddle Holster, and the Holster Mount.

Every individual holster kit contains everything needed to function on its own. As a bonus, these kits include additional parts designed for future carry positions.

The ShapeShift™ 4.0 IWB Holster is Alien Gear Holsters' most advanced inside-the-waistband (IWB) holster, and is designed with a variety of upgrades. To move past the performance of the Cloak Tuck 3.0, the new 4.0 boasts enhanced flexibility, comfort and concealment. The 4.0 IWB's size has also been significantly reduced to prevent printing.

Additional upgrades include new retention options, breathable CoolVent™ Neoprene, and a slimmer profile for enhanced concealment.

The ShapeShift™ Modular Holster System is backed by a Forever Warranty and a 30-Day Test Drive. The Starter Kit, which includes all four carry positions, is available for just \$99.88.

Future ShapeShift™ modular holsters include the shoulder, backpack, pocket, thigh, ankle, MOLLE and forearm carry positions.

Alien Gear Holsters' Tyler Botts explained the latest offerings came as a response to customer requests.

"We wanted to give customers the option to choose a holster that adapts to their specific needs as a carrier," Botts said. "While the Starter Kit provides the greatest savings, some carriers may only need one specific holster type. It all comes down to personal preference."

Find your ShapeShift™ holster today at AlienGearHolsters.com
