FOR IMMEDIATE RELEASE: (11/14/17)

Vision Engraving & Routing Systems Now Offers Black Box Brand Vacuum Pumps For Their CNC Routing Machines

Phoenix, AZ: [Vision Engraving & Routing Systems](#) is partnering with Black Box Vacuum Systems by adding the Hurricane and Storm vacuum pumps to their vacuum table CNC routers. The high performance [Storm](#) (2550 Engraver/CNC Router) and [Hurricane](#) (VR48 CNC Router) produce 9.5-10 inHg of vacuum holding power, adding (amount) times the ability of the previous models. Both durable pumps have a sound dampening base, a high flow cooling air fan, and easy access for replacing air filters. The speed of vacuum flow for the Storm is ~200 CFM and the Hurricane is ~400 CFM.

Black Box manufactures their quality vacuum systems in Canton, Georgia, and is a family owned company, qualities that Vision shares. Learn more about Black Box <http://blackboxvac.com/>

Vision Engraving & Routing Systems is the largest engraving machine manufacturer in the USA. Building rugged, reliable, low-maintenance engravers and CNC routers, packed with industry-leading features, and offering them at competitive prices to provide the best value for their customers.
