PRESS RELEASE

SHOT SHOW 2018

WMD Guns LLC: The Source of the Best High-Tech Surface Coatings and Firearms in the Industry: Booths #2601 Firearms/Products

WMD Guns is the leader in providing innovative firearms and performance coating solutions to OEMs, distributors, dealers and consumers. Our arsenal of coating technologies provides the largest selection of performance coatings in the industry. Come to SHOT Show 2018 booth #2601 where we feature our premium coated firearms and components. New this year is our special edition NiB-X[®] AK series, our NiB-X Survivor series of distressed/battleworn Beast[®] rifles and our 6.5 Creedmoor Long Range Beast. All rifles are hand build by our gunsmiths for peak accuracy, total reliability and long life.

- Only manufacture to offer a full line of performance coated products
- California compliant Chassis for your custom build
- Innovators of the renowned NiB-X BCG
- Coating upgrade service available again

One of our featured innovations is the Chassis[®] in .223-AR 15 platform and .308-AR 10 platform (California compliant). The Chassis[®] takes full advantage of WMD Guns' advanced surface treatments throughout the barrel, BCG and billet receiver assemblies, but ships without sights, stock, handguard or grip allowing dealers and users to customize the rifle to their own specifications. The Chassis is available in a variety of calibers, .223/5.56mm, 300 Blackout and .308 Winchester.

Originally introduced by WMD at the 2014 SHOT Show, the Chassis has been a tremendous success with Dealers. WMD President Wynn Atterbury noted, "The Chassis provides a dynamic platform for consumers to personalize their AR-15 or AR-10 builds. For Dealers, the Chassis provides a new option for working directly with clients to create the AR of their dreams: built to

last, highly reliable, easy to maintain, and customized with personal preferences. We offer multiple calibers, barrel choices and topcoat colors.” Features include:

- WMD’s renowned NiB-X bolt carrier group and NiB-X fire control group.
- Billet 7075-T6 aluminum receivers with rugged receiver walls to reduce firing flex, a flared magazine well for quick reloads, and an integrated trigger guard for gloved use and added strength. Front of the magazine well is textured for positive grip. Top rail features engraved “t” numbers.
- Match-grade barrels with Melonited bore, NiB-X coated exterior for long-lasting accuracy, heat dissipation and durability. .223/5.56mm are 16” 1:7-barrel, 300 Blackout are 16” 1:10 twist. 308 18” or 20” 1:10 twist barrels and our 1:8 6.5 Creedmoor barrels.
- Melonite gas tube and NiB-X coated low-profile gas block and the option of an adjustable gas blocks.

Our Coating Upgrade Program is Back! For dealers you can now offer upgrades and refinishing for your customers through our dealer coating program.

WMD Guns invites you to visit our booth #2601 and see the entire line of Beast Rifles and premium coated products, along with all our coating technologies: NiB-X, Nickel Teflon, Melonite, PVD’s, DLC, Blaze™, Powder Coats, Ceramics, and Anodize III+. Engineers, gunsmiths, team shooters and coating experts will be on hand in the booth to answer any questions. For OEM’s if you have an idea or a special project comes by and we will help you accomplish your goals. Distributors, we will help you with special projects/makeups from start to finish. Dealers can take advantage of these performance coated products to customize their own configuration.

See you real soon at SHOT!!
