

## **CMP Steel Targets Introduces - The X-Ring Plate Rack Target**

The X-Ring Plate Rack features an innovative reactive X-Ring inside the standard 8" plate target.

Shoot the center of the target and only the 4" X-Ring will fall. If you miss the X-Ring and hit the 8" outer plate, both targets will fall. Fine tune your plate rack skills with this challenging target.

The X-Ring Plate Rack was introduced at the 2017 NRA Bianchi Cup competition and is now on display at the SHOT Show booth 1308

The targets are made from 3/8" AR500 hardened steel for long life with pistol or rifle shooting.

The X-Ring Plate Rack is available with manual reset, or fully automatic pneumatic reset with competition controller.

### **Pricing and Availability**

The X-Ring Plate Rack is available now at [www.custommetalprod.com](http://www.custommetalprod.com). The price is set at \$2500 for the manual reset unit, and \$5000 for the fully automatic unit.
