

FOR IMMEDIATE RELEASE

Made for todays Concealed Carry market!

Based on skyrocketing conceal carry applications its clear people want to carry a firearm for their protection. But many also find carrying a pistol is difficult for them either due to the size, weight or having it be seen.

All of those obstacles have been addressed by the Ideal Conceal Pistol!

Now anyone can carry all the time!

It seems as though this world is getting a little crazier. Random acts of violence unfortunately are beginning to look like the norm.

This whole concept was derived out of my trying to carry my Colt Mustang .380. I got my permit to carry and decided it was time to practice carrying, so I used a belt holster to secure my gun to my side. My only problem was concealment. Granted I am a rookie when it comes to carrying a gun.

I was at a truck stop and decided to use the rest room. As I stood up a young boy saw my pistol as my "concealment" jacket actually hooked on the pistol, exposing it. The boy excitedly broadcast to the entire restaurant, "Mommy that man has a gun!"

As I said at the beginning that could mean there is a man pointing a gun! The whole place swiveled to look at me and realized it was just some guy who didn't conceal properly.

The realization set in that I had to find a better way for people to carry a gun without having an issue like mine, or encountering anti-gun clients or co-workers. Bottom line we only want you to have a gun you can carry.

The best gun is always the one you have with you.
