

Elftmann AR-9 Trigger 2 3/4lbs - 4lbs

Elftmann Tactical Introduces a new AR-9 Trigger

The ELF AR-9 Drop in trigger was developed for 9mm and .45 PCC platforms, but after tens of thousands of rounds of testing in all platforms, we have decided this is the ideal trigger for every AR platform. All ELF Performance Series Triggers now utilize this new design and include the Match, 3 Gun, AR-10, AR-9, and Service Triggers. All are single stage and built for performance. We have retained all our SKU's because in these days of search-engine driven sales, we want your customers to find what they are looking for.

The trigger has a u-shaped captured disconnecter that forces a positive hold on the hammer and also has a "pad" that matches up to an extension on the hammer. The pad is directly in line with the rear trigger pin so when the hammer is stopped by those matching surfaces it effectively eliminates trigger slap from the hammer hitting the disconnecter and greatly enhances the feel of the trigger during live fire.

The ELF performance series triggers utilize aerospace grade sealed bearings, making for an incredibly smooth and fast trigger pull. Pull weight is so easy to adjust it can be done in seconds without removing the trigger from your lower receiver. A second-to-none drop-in trigger system that is strong and light, made of wire EDM machined, hardened A2 tool steel and lightweight aircraft-grade aluminum. Installation can be done in minutes using your AR's original hammer and trigger pins. All ELF Triggers may be ordered with a curved or straight shoe.

The amazingly short take-up, glass-rod crisp break and next to zero over-travel can be compared to the finest custom 1911 triggers. Adjustability puts you in charge based on your current use. If you are looking for the finest adjustable trigger for your AR Based platform, this is the trigger system for you.
