

CREATED BY ARCTIC EVOLUTION

PUUKKO, THE NORDIC KNIFE, has traditionally been the most important survival tool in the harsh Arctic environment. It was the one go-to tool everyone carried. It was used for making firewood and kindling, for hunting and fishing, for cleaning the catch – be it fish or game – for cooking and eating. And in the most extreme situations, the knife could be used to defend oneself from the dangers nature had.

The Marttiini story began in 1928 at the land of dark Arctic winters and the summer midnight sun, when blacksmith Janne Marttiini decided to establish a knife factory to Rovaniemi in Finnish Lapland.

With the user in mind, he began to create beautiful, high-quality knives to be used in the harshest conditions imaginable – knives for people that used them every day.

But don't let the knife's beauty fool you. The moment you put one to a test, you'll be convinced it is the perfect tool for your need. You'll feel the quality of natural materials like leather, curly birch, reindeer antler, and of course the sharpness of the blade always made from finest steel.

Marttiini knives are still manufactured at the Arctic Circle. Today they are a combination of generations of craftsmanship heritage and modern technology that creates knives that are not only sharp but also represent the beauty and toughness of the North.

Every fisherman in the USA recognizes Rapala Fish'n Fillet knives. Marttiini has manufactured those for Rapala USA for more than 50 years. Today Marttiini knives is one of the Rapala VMC Corp. companies. And now we can offer the same ultimate sharpness and beauty for American hunters too.

WELCOME TO OUR BOOTH #1661 AT SHOT SHOW 2018.
